

21702

Item Number 9881559

With this hand pump, oil can be pumped directly from the oil tank into the compressor crankcase without air and moisture entering the refrigeration circuit. The compressor does not have to be evacuated and therefore the filling time is reduced by 70%.

- Capacity per pump stroke 50 ml
- Suction tube with 8 x 290 mm volume
- High-quality materials for long service life

Accessories

9881558	21702-01	Adapter for suniso oil can
